HEARING RESEARCH

Contents of Volume 91

No. 1/2

Research Papers

T. Kawase and T. Takasaka *(Japan)*
The effects of contralateral noise on masked compound action potential in humans 1

K. Sato, H. Kuriyama and R.A. Altschuler *(USA)*
Expression of glycine receptor subunits in the cochlear nucleus and superior olivary complex using non-radioactive in-situ hybridization 7

E. Felder and A. Schrott-Fischer *(Austria)*
Quantitative evaluation of myelinated nerve fibres and hair cells in cochleae of humans with age-related high-tone hearing loss 19

M.E. Díaz, A. Varela-Ramírez and E.E. Serrano *(USA)*
Quantity, bundle types, and distribution of hair cells in the sacculus of *Xenopus laevis* during development 33

M. Souter, G. Nevill and A. Forge *(UK)*
Postnatal development of membrane specialisations of gerbil outer hair cells 43

J. Song, H.Y. Yan and A.N. Popper *(USA)*
Damage and recovery of hair cells in fish canal (but not superficial) neuromasts after gentamicin exposure 63

R.J. Nozza *(USA)*
Estimating the contribution of non-sensory factors to infant–adult differences in behavioral thresholds 72

Y.L. Ma, K.J. Gerhardt, L.M. Curtis, L.P. Rybak, C. Whitworth and K.E. Rarey *(USA)*
Combined effects of adrenalectomy and noise exposure on compound action potentials, endocochlear potentials and endolymphatic potassium concentrations 79

G. Taschenberger, L. Gallo and G.A. Manley *(Germany)*
Filtering of distortion-product otoacoustic emissions in the inner ear of birds and lizards 87

S. Xue, D.C. Mountain and A.E. Hubbard *(USA)*
Acoustic enhancement of electrically evoked otoacoustic emissions reflects basilar membrane tuning: a model 93

L.D. Fechter and Y. Liu *(USA)*
Elevation of intracellular calcium levels in spiral ganglion cells by trimethyltin 101

K.I. McAnally and M.B. Calford *(Australia)*
Phase effects in forward masking of the compound action potential: a comparison of responses to stimulus and distortion frequencies 110

A.K. Pack and N.B. Slepecky *(USA)*
Cytoskeletal and calcium-binding proteins in the mammalian organ of Corti: cell type-specific proteins displaying longitudinal and radial gradients 119

N.B. Slepecky, C.G. Henderson and S. Saha *(USA, UK)*
Post-translational modifications of tubulin suggest that dynamic microtubules are present in sensory cells and stable microtubules are present in supporting cells of the mammalian cochlea 136

D.A. Cotanche, E.P. Messana and M.S. Ofsie *(USA)*
Migration of hyaline cells into the chick basilar papilla during severe noise damage 148

U. Ebert and J. Ostwald *(Germany)*
GABA alters the discharge pattern of chopper neurons in the rat ventral cochlear nucleus 160

M. Souter *(UK)*
Suppression of stimulus frequency otoacoustic emissions by contralateral noise 167

M. Vater and W. Siefer *(Germany)*
The cochlea of *Tadarida brasiliensis*: specialized functional organization in a generalized bat 178

K. Hisashi, T. Nakagawa, T. Yasuda, T. Kimitsuki, S. Komune and S. Komiyama *(Japan)*
Voltage-dependent Ca^{2+} channels in the spiral ganglion cells of guinea pig cochlea 196

C. Ferber-Viart, G. Savourey, C. Garcia, R. Duclaux, J. Bittel and L. Collet *(France)*
Influence of hyperthermia on cochlear micromechanical properties in humans 202

Erratum

J.K. Moore, L.M. Perazzo and A. Braun *(USA)*
Time course of axonal myelination in the human brainstem auditory pathway 208

Calendar of Events 210
